

# LUCIANO NICOLAS LOPEZ GONZALEZ

(+54) 291 406 6356 - Bahia Blanca, Argentina - lucholopez2810@gmail.com

Junior Programmer, Programming Technician graduated from UTN. Experienced in full-stack web development, with hands-on experience building complete systems including authentication, admin panels, and stock management. Passionate about programming and problem-solving, with strong adaptability and a results-driven mindset. Seeking opportunities to join a development team where I can contribute value and continue growing professionally.

## WORK EXPERIENCE

---

### Kiosk Management & Stock Control System

Developed a full-featured clothing e-commerce platform using Node.js, Express, TypeScript, React with TypeScript, MySQL, and Bootstrap. The application includes user authentication, a complete product catalog, purchasing flow, and an administrative dashboard for managing products, categories, and users. The project was built with a strong focus on scalability, maintainability, and clean full-stack architecture.

### Clothing Buy & Sell Web Platform

Built a web-based management system for kiosks and small retail businesses using Node.js, Express, TypeScript, React with TypeScript, MySQL, and Bootstrap. The system focuses on inventory and stock control, allowing administrators to manage products, track stock levels, and efficiently organize daily operations, improving accuracy and simplifying business management.

### Web App for Gym Appointment Management

Developed a complete web application for gym appointment and membership management using React, Node.js, Express, and MySQL. The system includes user registration and authentication, class scheduling with limited capacity, membership handling, and an administrative panel to manage classes and instructors, resulting in improved organization, scheduling efficiency, and overall operational control.

## EDUCATION

---

**Instituto María Auxiliadora** 2012 - 2023

*High School Diploma: Goods and Services, Natural Sciences*

**Universidad Tecnológica Nacional (UTN) – Bahía Blanca, Argentina** 2023-2025

*Programming Technician*
