Professional Profile

Full Stack Developer with a backend-oriented approach, experienced in academic projects and production-ready web applications. Focused on Node.js, React, and relational databases.

Education

National Technological University, in Programming – Bahia Blanca, Buenos Aires, Argentina Jan 2023 – Dec 2025

- Developed an academic e-commerce platform with stock and user management
- Built a strong foundation in programming, databases, and OOP

Experience

Waiter, Revoque Cafe – Bahia Blanca, Argentina Jan 2024 – Mar 2024

- Provided customer service in a hospitality environment
- Delivered direct customer assistance, ensuring a positive experience
- Managed orders, payments, and coordination with the kitchen
- Strengthened communication, teamwork, and time management skills

Projects

Concept & Hab Aug 2025 – Nov 2025

- Online clothing store with an admin panel and customer sales flow. Full Stack academic project with a strong backend focus
- Managed products, inventory, and orders from an administrator dashboard
- Implemented user authentication and purchase flow
- Prepared for potential production deployment

BarberShop Dec 2025 – Jan 2026

- Online platform for barbershop appointment management. Full Stack project developed 100% in TypeScript (Frontend and Backend)
- Admin panel for service management, user control, and schedule visualization
- Real-time booking system and a customer loyalty points program, prepared for potential production deployment

StixianBB Jan 2025 – Feb 2025

- First freelance job: a web app where users can order catalog or custom stickers online
- Built an admin panel to manage the sticker catalog, available sizes, and order flow
- Implemented end-to-end order management from customer request to admin processing
- Designed a responsive experience for both customer and administrator workflows
